Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 24 June 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

### **DETAILED ACTION**

This is the final Office Action for the serial number 10/079,102, LOW COST OPTOMECHANICAL MOUNT FOR PRECISELY STEERING/POSITIONING A LIGHT BEAM, filed on 11/8/02.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent # 5,800,311 to Chuang.

Chuang teaches the system (figure 2) comprising a sphere (40) having an opening shaped, a housing (11) adapted to receive the sphere, a magnet (34) attached to the housing and magnetically attracted to the sphere. The system further includes a cover (60) attached to the housing.

Chuang teaches the magnet but fails to teach plurality of magnets. It would have been obvious for one of ordinary skill in the art at the time the invention was made to have added additional magnets to the system to provide additional control of sphere using additional magnetic force thereon.

***Allowable Subject Matter***

Claim 18 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-5, 7-14 and 19-20 are allowed.

In regard to claims 1-5, 7-14 and 19-20, the prior art fails to teach the system further comprising a lid attached to the housing to apply a downward force upon the first set of balls, sphere, and second set balls. In regards to claim 18, the prior art fails to teach the system comprises a spring attached to the cover for applying a downward force upon the sphere.

***Response to Arguments***

Applicant's arguments filed 6/24/05 have been fully considered but they are not persuasive.

On page 8 of applicant's argument stating that Chuang is non-analogous art because his invention is related to wrist exerciser rather than optomechanical system of claims 15 and 17. The examiner disagrees that Chuang is non-analogous art because Chuang's invention is the optomechanical system for supporting the LED (43) as explained in specification (col. 1, lines 66-67 and col. 2, lines 1-5). The LED is secured in the sphere/rotor (40, as shown in figure 2) and that when the rotor rotates, the LED emits light to indicate the speed of rotation for rotor. LED is an optical element being secured in optomechanical system (sphere/rotor).

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
